EDUCATION

University of British Columbia

Bachelor of Arts, Economics (Major), Commerce (Minor), 5th Year

Sep 2022 – Dec 2026

Vancouver, Canada

- CFA Level I Candidate (Feb 2027) | Climate Reporting Analyst (UBC) | Life Cycle Assessment for SMEs (UBC)

WORK EXPERIENCE

Energy & GHG Emissions Coordinator

Sep 2026 – Dec 2026

UBC Campus + Community Planning

Vancouver, Canada

- Quantified campus energy use and GHG emissions for UBC's annual Climate Change Accountability Report (CCAR), tracking year-over-year performance and key drivers of change to measure progress toward UBC's CAP2030 emissions reduction targets.
- Assessed Scope 1–3 calculation methods, emission factors, and data quality across 5+ impact areas, including energy, food, waste, business air travel, and embodied carbon, to find and correct data gaps and errors before the report is publicly disclosed.
- Reconciled emissions data collected from cross-functional campus teams in Excel, tightening reporting controls and documentation to support an accurate, on-time annual regulatory submission to the BC government under the Climate Change Accountability Act.

Canada Climate Law Initiative

May 2026 – Sep 2026

Research Assistant

Vancouver, Canada

- Benchmarked climate disclosures of 100+ Canadian public companies against CSDS 2 across governance, strategy, risk management, and metrics and targets, measuring each company's readiness for Canada's new voluntary sustainability reporting standards.
- Built a 500+ data point assessment dataset in Excel and Power BI using standardized scoring criteria and quality checks, making disclosure quality directly comparable across companies, sectors, and reporting areas for the research team's analysis.
- Identified recurring disclosure gaps and cross-sector reporting trends and turned them into stakeholder-ready findings and recommendations to improve the reliability, consistency, and transparency of Canadian corporate climate-related reporting.

Sauder School of Business, UBC

May 2026 – Aug 2026

Undergraduate Research Assistant

Vancouver, Canada

- Automated text and readability analysis of 500+ patent documents using Python and Excel, replacing manual review and producing consistent, repeatable results that could be scaled across the full research dataset for further statistical analysis by the team.
- Reviewed 20+ academic studies on text analytics and readability measures, summarizing methods and quantitative findings into structured reports that set the project's research design, readability scoring approach, and key analytical decisions.
- Worked closely with faculty researchers to check analytical outputs for accuracy and document methods, assumptions, and results in clear written form, making technical findings easy for the wider research team to review, reproduce, and build on.

BMO SME Climate Clinic, UBC

Jan 2026 – Apr 2026

Climate Reporting Analyst

Vancouver, Canada

- Quantified a client's Scope 1, 2, and 3 emissions from operational and procurement data using the GHG Protocol, validating sources and assumptions to build a complete, traceable carbon inventory as the baseline for the client's emissions reduction planning.
- Modelled emissions drivers in Excel and built client-facing dashboards to compare decarbonization options, identifying opportunities to reduce the client's total emissions by approximately 20% and clearly showing where its largest emissions came from.
- Delivered a client sustainability report and implementation roadmap that turned carbon accounting results into clear disclosures and practical next steps, preparing the SME client to meet the requirements of the Net Zero Challenge and track progress over time.

Centrum Wealth

May 2025 – Aug 2025

Wealth Management Intern

New Delhi, India

- Analyzed performance, risk exposure, and market trends across 15+ client portfolios exceeding \$100K AUM, producing quantitative insights that informed the advisory team's portfolio reviews, risk discussions, and investment decisions for each client account.
- Automated client performance reporting by building 3 Excel dashboards with pivot tables, formulas, and conditional logic, cutting manual reporting time by 30% and making performance data more consistent and easier for the advisory team to access and review.
- Evaluated 10+ alternative investment products on structure, risk, and return profile, and prepared client-facing summaries and analytical materials that turned complex financial information into clear, actionable insights for client investment decisions.

SKILLS

Sustainability & Climate: GHG Protocol, Scope 1–3 Emissions, Carbon Accounting, GHG Inventories, CSDS 2, IFRS S1/S2, Climate Disclosure Analysis, Decarbonization Analysis, Life Cycle Assessment, Emission Factors, Climate Risk Disclosure
Finance & Analysis: Financial Analysis, Portfolio Analysis, Investment Research, Risk Assessment, Benchmarking, Excel Modelling, Regulatory Reporting, Data Validation, Data Quality Assessment, Performance Reporting, Dashboard Development
Tools: Excel (Advanced: pivot tables, lookups, conditional logic), Power BI, Python, SQL, R, STATA, OpenLCA, PowerPoint
Professional: Stakeholder Engagement, Client Reporting, Cross-Functional Collaboration, Research, Technical Writing
